differences in temperament as predictors of adult personality and schizophrenia. Personality traits have been shown to be differentially associated with male and female sex hormones. In a large community-based sample, we examined whether individual differences in temperament at 9 months of age predicted adult personality and schizophrenia in later life.

---

Temperament was measured in 230 male and 464 female infants as part of the Ontario Child Health Study using the Infant Character Inventory (ICI). To eliminate the confounding effects of sex hormones and intelligence on adult personality and schizophrenia, analyses were confined to men and women who were free of these factors at birth and who were measured for

Space Engine is a computer program that simulates the movement of stars, planets,

---

comets, moons, and other space objects in the solar system. With this utility, you can model the planets, moons, and comets of the Solar System, as well as their individual moons, asteroids, and Kuiper belt objects. You can use this program to study the motion of bodies in the Solar System and predict their orbits or to visualize their trajectories. The program also includes various

---

methods for orbit calculation. Key features:

- An interactive Universe with an accurate representation of the real Solar System
- Interactive 3D view of the Solar System
- Rotate the entire Solar System in space
- Orbit the planets of the Solar System
- Select a celestial body to look at it in more detail, such as the Moon, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, or Neptune
- A

database for all known Solar System objects. The program shows the approximate positions of various objects that are significant to humans. You can use the program to explore the depths of space and see what is beyond Earth. In addition, this tool can be used to learn more about the history of the Solar System, including predictions of future events.

## What's New In?

The universe is a place with limitless possibilities that lie outside of our reach. No one has been there yet and no one will be there in the foreseeable future. But today, we know so much about it, while the rest of the universe remains mysterious to us. Space Engine is a superb tool designed to help you delve

---

more deeply into the universe and that will inspire you to get to know the space through its experiences. The tool includes a wide variety of celestial bodies that are worth knowing about: stars, clusters, galaxies, extrasolar planets, asteroids, comets, new moons.
